Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-19 are pending in this application. Amended claim 16 and newly added claim 19 are noted. Claims 13-15, 17-18 have been withdrawn from consideration as being directed to a nonelected invention.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12, 16, 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, the phrase "wherein at least one of the AP pinned layer structure and the free layer are formed by a process other than ion beam deposition" is deemed new matter as there is no support for such a limitation in the original specification as filed. The same issue applies to the phrase in claim 16 which reads "wherein at least one of the free layer and antiparallel (AP) pinned layer structure are formed by a method other than ion beam deposition".

In newly added claim 19 line 4, the term "wafer" is deemed new matter.

Art Unit: 1762

Claims 1-12, 16, 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 1, the applicant requires at least one of the AP pinned layer structure and the free layer to be formed by a process other than ion beam deposition. The specification is not enabled for such a limitation. The specification clearly states the benefits of using IBD over the current state of the art process, i.e., plasma vapor deposition (PVD) (paragraph bridging pp.15-16). The same issue applies to claim 16.
